SKILLS

- Skilled in Algorithm Implementation, Strong in Front-End Development, Experienced in Back-End, Proficient in Object-Oriented Programming, Proficient in Java Programming, Strong in Python Programming, Strong in SQL, Strong in Database Management
-

PROJECTS

- Circus Of Plates: It is a single player-game implemented by java programming language in which the clown carries two stacks of plates, and there are a set of colored plates queues that fall, and he tries to catch them, if he manages to collect three consecutive plates of the same color, then they vanish, and his score increases. [GitHub Link](#)
 - Prompt Hub: It is a website implemented by Next.js Share. It is the go-to platform for AI enthusiasts to share and explore creative prompts used for generating AI-powered content. Share your prompts, discover new ideas, and collaborate with a community passionate about AI innovation. [GitHub Link](#)
 - Mini-Paint application: This project is implemented by java programming language to design an object-oriented model of geometric shapes and to create an advanced GUI with 2D graphics capabilities. [GitHub Link](#)
 - Aora App: It is a mobile application implemented using React Native. Used to upload and share your AI-generated videos with the world! Share the creative prompts behind your videos, connect with other creators, and discover new content. Explore a community driven by AI creativity, all from your mobile device. [GitHub Link](#)
